Dear Friends in Christ,

Happy Mother's Day to all of our mothers.

There is an excellent document written by Pope Saint John Paul II on the Dignity of Woman. In it he says this:

“The human being - both male and female - is the only being in the world which God willed for its own sake. The human being is a person, a subject who decides for himself. At the same time, man "cannot fully find himself except through a sincere gift of self". It has already been said that this description, indeed this definition of the person, corresponds to the fundamental biblical truth about the creation of the human being - man and woman - in the image and likeness of God. This is not a purely theoretical interpretation, nor an abstract definition, for it gives an essential indication of what it means to be human, while emphasizing the value of the gift of self, the gift of the person.”

“This truth about the person also opens up the path to a full understanding of women's motherhood. Motherhood is the fruit of the marriage union of a man and woman, of that biblical “knowledge” which corresponds to the “union of the two in one flesh” (cf. Gen 2:24)...

“...The eternal mystery of generation, which is in God himself, the one and Triune God (cf. Eph 3:14-15), is reflected in the woman's motherhood and in the

man's fatherhood. Human parenthood is something shared by both the man and the woman. Even if the woman, out of love for her husband, says: “I have given you a child”, her words also mean: “This is our child”. Although both of them together are parents of their child, the woman's motherhood constitutes a special “part” in this shared parenthood, and the most demanding part. Parenthood - even though it belongs to both - is realized much more fully in the woman, especially in the prenatal period. It is the woman who “pays” directly for this shared generation, which literally absorbs the energies of her body and soul. It is therefore necessary that the man be fully aware that in their shared parenthood he owes a special debt to the woman. No programme of “equal rights” between women and men is valid unless it takes this fact fully into account.

“Motherhood involves a special communion with the mystery of life, as it develops in the woman's womb. The mother is filled with wonder at this mystery of life, and “understands” with unique intuition what is happening inside her. In the light of the “beginning”, the mother accepts and loves as a person the child she is carrying in her womb. This unique contact with the new human being developing within her gives rise to an attitude towards human beings - not only towards her own child, but every

human being - which profoundly marks the woman's personality. It is commonly thought that women are more capable than men of paying attention to another person, and that motherhood develops this predisposition even more. The man - even with all his sharing in parenthood - always remains “outside” the process of pregnancy and the baby's birth; in many ways he has to learn his own “fatherhood” from the mother. One can say that this is part of the normal human dimension of parenthood, including the stages that follow the birth of the baby, especially the initial period. The child's upbringing, taken as a whole, should include the contribution of both parents: the maternal and paternal contribution. In any event, the mother's contribution is decisive in laying the foundation for a new human personality.”

Let us thank the Lord for the love He has for us in giving us our mothers, who bear great burdens and suffer much for the sake of those entrusted to their care.

Please pray as well this week for all of our young people who will receive Holy Communion this coming weekend. It is hopefully the beginning of a much more fruitful life of faith with regular participation in the sacramental life.

May God bless you this week!
